Bedroom Blackout Roman Shades**

Product Description

Product Description

Manual/ Intelligent motorized blackout Roman shades for office, bedroom

Roman blinds are made from fabric that is designed to pleat when raised. The blinds are constructed by mounting slats, which are connected to cords, into the back of a fabric panel. When the blind is lifted, the cords pull the slats together and force the blind to fold into pleats. This type of blind can be fitted either outside or within the recess. We recommend opting for outside, as it allows for increased light and is very easy to fit.

Different types of fabric can be used for Roman blinds, from silk and linen to cotton and synthetics. They are a great alternative to curtains, as there's a huge variety of colors, patterns and textiles is available.

Roman blinds allow for easy and effective light control. They can be adjusted depending on the time of day or season, and blackout options are available if total darkness is required. By choosing thermal lining, they can be made more energy efficient.
